MLS LASER THERAPY

MLS (Multiwave Locked System) Therapy Laser is a form of next generation technology that uses specific wavelengths of light to treat painful and debilitating conditions.

HOW DOES IT WORK?

Light energy enters the damaged cells and stimulates inter-cellular activity. This reduces pain in the area and speeds recovery of the damaged cells. Once the cells recover, the healing process is complete. Most people experience positive results in 1 to 3 treatments, with the average course of treatment being 7 to 10 sessions.

ADVANTAGES & BENEFITS

- Laser therapy can offer relief to those suffering with both chronic and acute ailments of the lower extremity without the use of painful injections or potentially habit-forming drugs.
- MLS Laser Therapy has a strong anti-inflammatory, anti-edema effect on tissues that are exposed to the laser.
- Cells of tendons, ligaments and muscles repair themselves faster.
- Laser energy kick-starts the healing process, thereby shortening recovery.

MLS THERAPY TREATS

- Tendon & ligament Injuries
- Sore muscles, muscle strains & tears
- Degenerative joint conditions
- Neurological & general pain, & bruising
- Musculoskeletal disorders
- Pre & post-surgical treatment
- Anti-inflammation applications
- Specific neurological conditions

IF YOU ARE EXPERIENCING CHRONIC OR ACUTE LOWER EXTREMITY PAIN, VISIT AUSTIN FOOT AND ANKLE SPECIALISTS TO SEE IF MLS LASER THERAPY MAY BE RIGHT FOR YOU.
